

Probe Tips by **MDC**

We have a variety of probe tips available. They are usually supplied 5 tips per box. All probes have a shaft diameter of 0.020" to 0.025" and will fit in a standard probe holder, except the Model 896-PRB-01, which requires a special Retractable probe holder, Model 896-xx.

Part Number	Material	Features
PSE-T	tungsten	standard, general purpose, 5 micron tip
PSE-GA	flexible tungsten	Fine 0.005" tungsten wire on 0.020" shaft, flexible tip for contact retention. Tip radius is 0.5 micron.
PSE-TB	tungsten	blunt, general purpose, 25 micron tip
PSE-O	osmium	low contact resistance, 12 um tip radius
PSE-S	steel	very hard, cannot be bent, poly contact
PSE-TC	tungsten carbide	very hard, cannot be bent, brittle, 10 um tip radius
PSE-P	palladium	low contact resistance
PSE-CW	tungsten "cat whisker"	clean metal contact only
PSE-BC	beryllium copper	high current, 12 um tip radius
896-PRB-01	tungsten	Retractable, spring-loaded tip, stable, 0.002" diameter tip
